Product description

Metal pallet collar 120x80x80 cm suitable for Euro pallets, mesh 50x50 mm. Equipped with a practical folding window on the long side, making the contents easily accessible. The mesh extension walls can be stacked on pallets up to a stacking load of 2 tons. The advantage compared to gitter boxes is that these mounting walls take up much less space when they are not used or are returned empty. Very suitable for the storage or transport of bulk goods, but can also be used as shop bins (wire baskets) within the retail sector.
