Product description

2 rack roll cage, bearing the Kruizinga trademark, is a practical transport solution for various applications. Equipped with 2 removable clamp gates made of galvanized steel, keeping the cargo securely in place during transport. Comes standard with 2 nylon straps to keep the goods firmly in place and prevent them from sliding or falling. The rolling cart has a wooden rolling base with dimensions of 720x800 mm, which provides enough space to load and transport goods efficiently. Due to the width of 720 mm, exactly 3 roll containers fit side by side in a trailer. The roll bottom is sturdy and durable, suitable for carrying heavy loads up to 500 kg. In addition, the wooden roll bottom is "Heat Treated". By performing this Heat Treatment, all harmful organisms are killed. Wood that undergoes Heat Treatment meets the ISPM15 requirement. ISPM15 applies to solid wood packaging used to support, protect or transport goods. To easily move the roll cage, it is equipped with 2 fixed-wheel and 2 swivel wheels made of rubber with a diameter of 125 mm. This ensures maneuverability and smooth mobility even on uneven surfaces. Are you temporarily not using the roll cages? Deal efficiently with your storage space and remove the clamp gates from the roll bottom and make a bundle of 5 (see last photo). In short, an indispensable tool used in various industries such as retail, supermarkets, logistics, distribution and manufacturing.
