Product description

Steel drip tray suitable for three IBC containers. The tray is made of painted steel, while the grille is made of hot-dip galvanized steel. The capacity of the collection tray is 1163 litres.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety in accordance with PGS 15 (publication series of hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid container is collected. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New

Version: for 3x 1000 l IBC

Walls: walls closed

Top: 1000kg/m²

Colour: colorless

Length (mm): 3850

Height (mm): 340

Collection volume (ltr): 1163

EAN Code (Gtin) 8719424006179

Type: receptacle for IBC

Material: steel

Floor: with galvanized grid

Subgroup: retention basin steel

Surface treatment: galvanized

Width (mm): 1300

Weight (kg) 338

Type number: 404-1000
