Product description

Recessed drop-off pole - manual - yellow/black. A countersunk drop-off post solves many drop-off problems better than other posts. Ideal for streets and squares that are only temporarily open to traffic: pedestrian zones, market squares, parking areas, garage entrances, gates, etc.

The bollard can be lowered in seconds with an overhead trike key (fire hydrant key) according to DIN 3223: Traffic can move unhindered over the almost flat ground sleeve. The triangular key can be ordered separately.

In the manual version of the PARAT-Lift retractable bollard, a spiral spring, after unlocking with the triangular key, pushes the bollard 5 to 8 cm out of the ground sleeve. The post is then raised by hand until it locks automatically. Upon lowering, the unlocked upper part is pushed down manually until it locks into the ground sleeve.

Features of the PARAT-Lift retractable post

- Total length with post extended 2050 mm, of which 1150 mm underground
- Ø post 76 mm, ground sleeve 100 x 100 mm
- Easy installation
- In case of damage, the post can be easily replaced.
- Corrosion-resistant standard design: all steel parts are hot-dip galvanized, the post is additionally protected with an environmentally friendly two-component thick layer paint

Specifications

Article arrangement: New

Version: crash protection bollard yellow/black

Subgroup: Barriers

Surface treatment: painted und galvanized

Height (mm): 2050

Type number: 42-STBP

Type: bumper protection

Material: steel

Colour: black/yellow

Width (mm): 76

Weight (kg) 23

EAN Code (Gtin) 8719424057638
