Product description

Used stacking bin plastic with the standard dimensions of 600x400 mm according to the Euronorm, making it suitable for standardized logistics applications, such as pallets and racks. With a capacity of 30 liters, the bin offers sufficient space for storing and transporting goods. Made of food-grade HDPE (High-Density Polyethylene), which means the material is safe for storing food. HDPE is known for its durability and resistance to chemicals. The smooth inner walls and bottom facilitate cleaning and maintenance of the bin. This is especially important in environments where hygiene is essential, such as the food industry. Closed handles make it easy to lift and move the bin, and contribute to a streamlined design with no protruding parts that can get stuck or cause damage. Because the bins are stackable among themselves, they can be efficiently stored and transported, saving valuable space when not in use. Because of its food-grade HDPE material, it is ideal for storage and transport in the food industry. The closed handles also make it suitable for applications in warehouses, distribution centers, and other logistics environments. In short, this stacking bin combines durability, efficiency in storage and transportation, and suitability for use in different environments, making it a versatile choice for various industries.

Notice! Features 2 different shaped closed handles (see photos). These are not picked out.

Specifications

Article arrangement: Used
Version: all walls closed
Walls: walls closed
Food-safe: yes
Colour: white
Length (mm): 600
Width (mm): 400
Height (mm): 170
Volume (ltr): 30
Type number: 8055GB

Type: stackable
Material: HDPE
Floor: closed
Euronorm (mm): 600 x 400
Surface treatment: signs of use
Internal length (mm): 550
Internal width (mm): 350
Internal height (mm): 160
Weight (kg) 2
EAN Code (Gtin) 8719424234206
