Product description

A used steel stacking bin on legs with 4 closed and profiled walls is a robust and versatile storage container. This type of stacking bin is often used for storing and transporting parts, materials, tools and other items in various industries, such as manufacturing, logistics and construction. The stacking bin is made of sturdy steel, which ensures durability and resistance to wear, impact and other forms of damage. The four closed and profiled steel walls offer protection to the bin's contents. The stacking lugs are designed to safely stack the bins on top of each other, saving valuable space during storage and transport. The storage bin stands on legs, making it easy to pick up by forklift or pallet truck. The presence of lifting lugs makes it possible to lift and move the stacking bins using lifting equipment (note! not certified for lifting), increasing flexibility and ease of use.

Specifications

Article arrangement: Used
Version: 4 sides
Walls: corrugated steel plate
Colour: colorless
Length (mm): 970
Width (mm): 610
Height (mm): 520
Insertion height (mm): 100
Volume (ltr): 149
Type number: 7007GB
EAN Code (Gtin) 8719424229387

Type: fixed construction
Material: steel
Floor: flat steel
Surface treatment: galvanised with signs of use
Internal length (mm): 890
Internal width (mm): 530
Internal height (mm): 340
Stackable height (mm): 450
Application: stacking - not certified to hoist
Additional specifications: with hoisting eyes
