Product description

A used construction storage pallet made of hot-dip galvanized steel is a versatile and durable storage unit designed specifically for the construction industry. The hot-dip galvanized steel ensures long life and makes the pallet resistant to corrosion, allowing it to be used both indoors and outdoors. The pallet is equipped with 4 fixed stanchions with stacking lugs. These stanchions allow goods to be stacked safely on the pallet and prevent them from shifting or falling over during transport. The stacking cams are designed to allow stable stacking, maximizing storage space utilization. Easy to pick up and move with a pallet truck or forklift. All in all, a construction storage pallet made of hot-dip galvanized steel is a reliable and efficient solution for organizing and protecting materials in the construction industry.

Specifications

Article arrangement: Used

Version: stackable

Surface treatment: galvanised with signs of use

Internal length (mm): 1345

Internal width (mm): 840

Internal height (mm): 495

Weight (kg) 42

EAN Code (Gtin) 8719424230192

Type: fixed construction

Material: steel

Length (mm): 1530

Width (mm): 1027

Height (mm): 703

Insertion height (mm): 100

Type number: 7054GB
