Product description

Used stackable and collapsible stacking racks / tire racks with open bottom construction and space for a single row of tires. With the plug-in brackets on the long side, the tire rack is easy to move. When folded and unfolded, the tire racks are extremely easy to stack and store.

The racks are extremely suitable in environments such as the automotive industry, garages, workshops, warehouses or distribution halls. Because the height of the stacking racks is 1300 mm, you can store tires very high. All this for a more effective warehouse!
